

# Function Table Plans

Our dining room is licensed for 120 people. If the party exceeds one hundred guests we would have to work in close collaboration to achieve a satisfactory and comfortable table plan.

Our top table can cater for upto 12 people on a straight table, any more than that and we would have to consider placing the tables at an angle.

Round tables can hold 4 - 6 people, seven at a push

Oblong tables can hold a minimum of seven but a comfortable eight. More can be catered for by putting these tables together, please ask about the limitations.

Depending on the size of a function, working together, we can usually satisfy your needs. Round tables are very popular as they are considered much more informal but they do take up a lot of room so as restricting numbers. The maximum that we can cater for using the majority of round table (having to use some long tables and including a top table) is 96. If your party wishes all round tables (and with no top table) we can cater for upto 72 people.
